

Commodore™ 20

Carpet Extractor

Windsor's Commodore™ 20 is the industry's unbeatable value for powerful carpet extraction.

- Cleans up to 8000 sq. ft. per hour for increased productivity
- Exceptional maneuverability and low profile, compact design makes it easy to operate in small areas
- Unique *Penetrator™* vacuum shoe design provides superior recovery
- Easy to use controls reduce training time
- 20 gallon capacity

WINDSOR®
Dependability

High-Powered Savings

Windsor's Commodore™ 20 provides the most value per gallon capacity in the industry.

- Maximum productivity for large areas without sacrificing maneuverability for small, hard-to-reach places.
- Decrease training time and increase operator uptime.

The Commodore 20 was designed to give you more for your money.

Easy Operation

The Commodore 20 combines performance breakthroughs and ergonomics to create a machine that maximizes operator productivity. The low-profile, compact design provides great sight lines for safer operation.

Simple controls make it easy to operate the Commodore 20.

Use the Commodore 20 for all your carpeted areas. It's easy to transport and tough enough to transfer between job sites.

Streamline Productivity

Work smarter and spend more time cleaning, less time refilling. The 20 gallon capacity and self-propelled variable speed control makes any operator more productive.

The slender design of the Commodore 20 is ideal for smaller or hard-to-reach areas.

Precision balance, short wheelbase, and extra large wheels provide quick, effortless turns.

Leading the Way

Everyone is talking about Indoor Air Quality and protecting your carpet investment. Use a quality extractor and you're ahead of the game.

We took the latest technology and designed the *Penetrator*™ vacuum shoe for the Commodore 20. The *Penetrator* channels airflow evenly along the entire vacuum shoe, creating a powerful seal for superior recovery and dry times.

Maintenance Made Simple

As with any piece of working equipment, scheduled maintenance ensures peak efficiency. But, if an operator doesn't understand the process or can't access parts, routine maintenance becomes difficult.

The Commodore 20 makes it easy. The large opening recovery tank, accessible solution filter, and large quick release jets are designed for simple maintenance.

Performance Features

- **All-in-one controls and ergonomically designed handle simplify use and increase operator comfort.**

- **Quick-change solution jets for easy maintenance and accessory tool connection for increased versatility.**

- **Externally mounted solution filter is easy to access.**

- **Large solution opening and clear dome save time and maintain peak performance.**

- **Self-propelled design for consistent operator productivity.**
